

“Toucan Design gave us a professional service and an instinctive design flare that understood the message we were trying to convey and delivered it in an original and inviting format to encourage interest. We are delighted with their service and will be continuing our relationship with them for further work.”

Nick Groves, Director,
Vicus UK ProTime Recorder Software

TIME RECORDING SOFTWARE

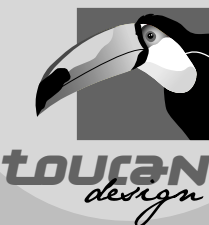

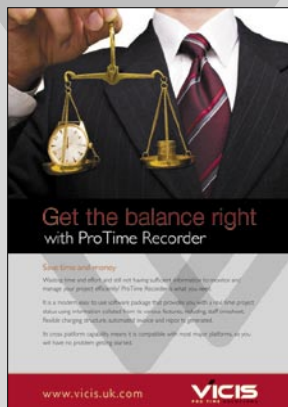

Case study

Client: Vicis Prottime Solutions Software

Sector: Private and Public Sector

Description: The client asked us to design a corporate identity for Vicis Prottime Recorder, a time recording software package. The brief was to create a professional modern approach that could be used for brochures, user manuals, cd covers, magazine advertising and flyers. They needed two logos, for different entry levels of the product, but still retaining a corporate feel. We designed a clean fresh design that reflected the professional image.

Services: Design, Production, Photography, Print Management and advertising.
